SOVIET ASTRONOMY - AJ

Volume 6, 1962

SOVIET ASTRONOMY–AJ

Vol. 6, 1962

(Russian Original Vol. 39, 1962, the journal Astronomicheskii Zhurnal)

Alekseev, V. M. New Examples of Capture in the Three-Body Problem - 565

Alekseev, V. M. An Example of "Exchange" in the Three-Body Problem with a Negative Energy Constant - 858

Alekseev, Yu. I., V. I. Babii, V. V. Vitkevich, M. V. Gorelova, and A. G. Sukhovei. Observations of the Solar Radio Emission on Meter Wavelengths During the Total Solar Eclipse of February 15, 1961 - 504

Arkhipov, V. P. The Emission Star HD 51585 - 286

Arkhipova, V. P. and O. D. Dokuchaeva. Spectrophotometry of AG Pegasi - 483

Artyukhina, N. M. The Proper Motion of the Star BD + 40° 4124 Associated with Nebula S 213 - 429

Artyukhina, N. M. Star Density in the Praesepe Cluster - 815

Artyukhina, N. M. and P. N. Kholopov. A List of Novae Recommended for the Determination of Coordinates and Proper Motions - 878

Babenkov, K. A., see Braude, S. Ya. - 122

Babii, V. I., see Alekseev, Yu. I. - 504

Barabashov, N. P. and V. I. Garazha. The Microstructure of the Lunar Surface - 237

Bartaya, R. A. Excess Ultraviolet Radiation in the Spectrum of FU Orionis - 119

Belevich, V. F. Retardation of Stellar Rotation - 696

Belorossova, T. S., N. V. Merman, and M. A. Sosnina. A New Mirror-Lens Objective - 260

Bespalov, A. V. New Determinations of Elements of Visual-Binary Orbits - 882

Biberman, L. M., G. E. Norman, and K. N. Ul'yanov. The Photoionization of Excited Complex Atoms and Ions - 77

Bibinova, V. P., A. D. Kuz'min, A. E. Salomonovich, and I. V. Shavlovskii. Observations of the Radio Emission from Venus and Jupiter on a Wavelength of 3.3 cm - 840

Bobrov, M. S. On the Observation of the Occulation of Stars by Saturn's Rings - 525

Braude, S. Ya., A. V. Men', I. N. Zhuk, and K. A. Babenkov. The Radio Emission Spectrum of Cassiopeia A at Frequencies below 30 Mc - 122

Braude, S. Ya., see Sodin, L. G. - 423

Brodskaya, E. S. and N. B. Grigor'eva. Interstellar Absorption Near the Supernova of 1572 - 586

Bronnikova, N. M. Wide Star Pairs in the Vicinity of the Four Open Clusters NGC 1513, 1960, 2099, and 6705 - 880

Bunin, V. A. Eclipsing Binaries and the Dispersion of the Velocity of Light in a Vacuum - 598

Butslov, M. M., I. M. Kopylov, V. B. Nikonov, A. B. Severnyi, and K. K. Chuvaev. Experience in Image Converter Photography of Galaxies in H_α Light on the 2.6-Meter Reflector of the Crimean Astrophysical Observatory - 244

Bystrov, N. F. Automatic Performance of Astrometric Measurements of Lunar Plates with a Photoelectric Device - 109

Bystrov, N. F. Determination of the Position of the Moon's Center of Mass from Photographic Observations - 412

Chertoprud, V. E., see Gudzenko, L. I. - 590

Chistyakov, V. F. On the Observed Depths of Sunspots - 363

Chuvaev, K. K., see Butslov, M. M. - 244

Dokuchaev, V. P. Magnetohydrodynamic Instability of Solar Corpuscular Streams - 784

Dokuchaeva, O. D. and L. Ya. Kraush. Increasing the Sensitivity of Astronomical Photographic Plates - 855

Dokuchaeva, O. D., see Arkhipova, V. P. - 483

Dvoryashin, A. S., L. S. Levitskii, and A. K. Pankratov. X-Ray Emission from Flares - 340

Elenevskaya, N. B. The Region of Convergence of Series Expansions of the Coordinates of Unperturbed Motion - 726

Eminadze, T. A. On the Cause of Nova Outbursts - 431

Esipov, V. F. Wavelengths of Forbidden Lines of Sulfur in Nebulae - 287

Esipov, V. F., see I. V. Volkov - 253

Fesenko, B. I. Conference-Seminar of the Working Group on the Kinematics and Dynamics of Stellar Systems - 602

Fesenkov, V. G. On the Nature and Origin of Comets - 459

Fisher, I. Z., see Shirokov, M. F. - 699

Fomenko, B. D. Properties of M-Type Corpuscular Streams, Found from Analysis of Their Effect on the Troposphere - 653

Frank-Kamenetskii, D. A. Physical Processes within the Stars - 600
Frank-Kamenetskii, D. A., see Kuznetsova, T. D. - 191
Frank-Kamenetskii, D. A., see Nadezhin, D. K. - 779
Frantsman, Yu. L. Determination of the Coordinates of Planetary Nebulae from Photographs taken with an Objective Prism - 198

Garazha, V. I., see Barabashov, N. P. - 237
Genkin, I. L. The K-Effect and the Spiral Structure of the Galaxy - 10
Genkin, I. L. The K-Effect in the Galaxy M 31 - 813
Gershberg, R. E. Letter to the Editor - 126
Gershberg, R. E. Type II Supernova Ejecta and H_α-Emission Stars - 802
Getmantsev, G. G. On the Isotropy of Primary Cosmic Rays - 477
Getmantsev, G. G. The Heating of Interstellar Gas by Cosmic Rays - 670
Gindilis, L. M. Absolute Spectrophotometry of the Gegenschein Continuum - 67
Gindilis, L. M. The Gegenschein as an Effect Produced by the Scattering of Light from Particles of Interplanetary Dust - 540
Glasko, V. B., see Ortenberg, F. A. - 714
Goloborod'ko, T. A. An Empirical Relation between the Rotational and Orbital Momenta of the Major Planets - 592
Golovina, L. A. The Magnitude Equation Due to Coma of an Astrograph Objective - 416
Gorbatskii, V. G. Dynamics of Nova Envelopes - 154
Gorelova, M. V., see Alekseev, Yu. I. - 504
Grebnikov, E. A. Conference on General and Applied Problems of Theoretical Astronomy - 440
Grigor'eva, N. B., see Brodskaya, É. S. - 586
Grushinskii, N. P. and M. U. Sagitov. Some Considerations on the Lunar Gravitational Field - 113
Gudzenko, L. I. and V. E. Chertoprud. An Analysis of Periodic Solar Activity - 590
Gurshtein, A. A. Temperature Effects on Determination of the Angular Value of a Micrometer Screw Turn in the Ocular Micrometer of the ZT-180 Zenith Telescope, Using the Method of Wide Scale Pairs - 272

Imshennik, V. S. The Zemplene Theorem for a Hot Gas in Equilibrium with Radiation - 426
Ivanov, V. V. On Gordon and Pichakhchi's Paper, "Emission by Hydrogen Atoms Excited by Synchrotron Radiation from Relativistic Electrons." - 597
Ivanov, V. V. Diffusion of Resonance Radiation in Stellar Atmosphere and Nebulae. I. Semiinfinite Medium - 793
Ivanov-Kholodnyi, G. S. and G. M. Nikol'skii. Extreme Ultraviolet Solar Radiation and the Structure of the Solar Atmosphere in Active and Undisturbed Regions - 609

Jung-hao, Ch'in. Observations of the Source Sagittarius A on 1500 Mc - 124

Kachalov, V. P. Sensitive Bi I Lines in the Solar Spectrum - 760
Kalikhevich, N. S. A Diurnal Term in Time- Service Observations - 275
Kamochkin, B. A. and S. S. Tovchigrechko. A Photoelectric Attachment to a Printing Chronograph - 291
Kaplan, S. A. Forty Years of Astronomy in the USSR: 1917-1957 - 127
Kaplan, S. A. The Scattering of Light in a Nonsteady-State Medium - 549
Karachentsev, I. D. On Intergalactic Absorption - 427
Kardashev, N. S. Nonstationarity of Spectra of Young Sources of Nonthermal Radio Emission - 317
Kardashev, N. S., A. D. Kuz'min, and S. I. Syrovatskii. The Nature of the Emission from the Radio Galaxy Cygnus A - 167
Kardashev, N. S., see Lozinskaya, T. A. - 658
Katasev, L. A. Determination of the Height of the Homogeneous Atmosphere and the Extra-Atmospheric Velocity of a Meteor - 583
Khokhlova, V. L. The Formation of K_3 and H_3 Absorption Components on the Emission Lines in the Solar Spectrum - 875
Kholopov, P. N., see Artyukhina, N. M. - 878
Khromov, G. S. Masses and Forms of Planetary Nebulae - 370
Kislyakov, A. G., A. D. Kuz'min, and A. E. Salomonovich. 4-mm Radio Emission from Venus - 328
Klimishin, I. A. On the Theory of Stellar Shock Waves - 692
Klimishin, I. A. Determination of Build-Up of Radiation Intensity Prior to the Emergence of a Shock Wave at the Surface of a Star - 782
Klyakotko, M. A. and N. I. Kozhevnikov. The Character of Large-Scale Motions in the Solar Photosphere - 763
Kolesov, A. K. Continuous Spectra of Hot Stars - 24
Kondurar', V. T. On Perturbations in the Translational-Rotational Motion of a Satellite and Planet Caused by their Oblateness - 405
Kondurar', V. T. On the Existence of Resonance Phenomena in the Motion of a Satellite Resulting from Its Shape and the Form of Its Orbit - 865
Kononovich, É. V. The Probability of Hydrogen Ionization by Electron Impact - 811
Kopecký, M. The Theoretical Interpretation of the East-West Asymmetry in Sunspot Activity - 40
Kopylov, I. M., see Butslov, M. M. - 244
Koval', I. K. and A. V. Morozhenko. Several Properties of the Yellow Haze Observed on Mars during 1956 - 45
Kozhevnikov, N. I., see Klyakotko, M. A. - 763
Kraush, L. Ya., see Dokuchaeva, O. D. - 855

Krotikov, V. D. and V. S. Troitskii. The Emissitivy of the Moon at Centimeter Wavelengths - 845
Kuleshova, K. F. The Fine Structure of the Spot-Formation Zones - 213
Kulikovskii, P. G. The Eleventh General Assembly of the International Astronomical Union in Berkeley - 298
Kuprevich, N. V. Experimental Television Photographs of the Moon in the Spectral Region 0.8-2.3 μ - 883
Kurt, V. G. An Investigation of the Spectrum of the Solar Corona in the Wavelength Region 7800-12,000 A During the Total Solar Eclipse of February 15, 1961 - 349
Kurt, V. G. On the Relative Intensities of the Coronal Lines Fe XIII λ 10 747 and λ 10 798 - 620
Kurt, V. G. Letter to the Editor - 886
Kuz'min, A. D. The Spectra of the Discrete Radio Sources Observed with the 22-m Radio Telescope - 15
Kuz'min, A. D. and R. I. Noskova. An Identification of Exciting Stars and a Determination of the Parameters of Emission Nebulae from Radio-Astronomical Data - 186
Kuz'min, A. D. and A. E. Salomonovich. Observations of Radio Emission from Venus and Jupiter at 8 mm Wavelength - 518
Kuz'min, A. D., see Bibinova, V. P. - 840
Kuz'min, A. D., see Kardashev, N. S. - 167
Kuz'min, A. D., see Kislyakov, A. G. - 328

Absorption of Light
Interstellar Absorption Near the Supernova of 1572. É. S. Brodskaya and N. B. Grigor'eva -586
Letter to the Editor. R. E. Gershberg -126
Methods of Investigation of Thin, Dark Nebulae by Means of Star Counts. T. A. Uranova -376
On Intergalactic Absorption. I. D. Karachentsev -427
On the Structure of the Spiral Arm in Orion. I. I. Pronik -284
The Photoionization of Excited Complex Atoms and Ions. L. M. Biberman, G. É. Norman, and K. N. Ul'yanov -77

Abstracts
Abstracts of Papers on Astrophysics Published in Radiofizika, Vol. 4, Nos. 5 and 6, 1961, and Vol. 5, No. 1, 1962 -603
Abstracts of Papers on Astrophysics Published in Radiofizika, Vol. 4, Nos. 5 and 6, 1961, and Vol. 5, Nos. 2 and 3, 1962 -891

Abundances of Elements
Sensitive Bi I lines in the Solar Spectrum. V. P. Kachalov -

Associations of Stars
Neutral Hydrogen in the T-Association Tau T2. G. B. Sholomitskii -595

Astrometry
An Unsolved Astrometrical Problem. A. A. Yakovkin -573
Automatic Performance of Astrometric Measurements of Lunar Plates with a Photoelectric Device. N. F. Bystrov -109
Determination of the Coordinates of Planetary Nebulae from Photographs taken with an Objective Prism. Yu. L. Frantsman -198
Determination of the Position of the Moon's Center of Mass from Photographic Observations. N. F. Bystrov -412
Investigation of Instrumental Errors of a Photographic Zenith Tube. V. A. Naumov -264
On the Origin of $\Delta\alpha_\alpha$ Errors. G. P. Pil'nik -100
Temperature Effects on Determination of the Angular Value of a Micrometer Screw Turn in the Ocular Micrometer of the ZT-180 Zenith Telescope, Using the Method of Wide Scale Pairs. A. A. Gurshtein -272

Astronomical Unit
The Astronomical Unit of Length. A. A. Mikhailov -449

A Course in Spherical Astronomy. K. A. Kulikov. Reviewed by D. V. Pyaskovskii -129
Aerodynamic Phenomena in Stellar Atmospheres—Proceedings of the Fourth Symposium on Cosmical Gas Dynamics, Bologna, 1961. Reviewed by S. B. Pikel'ner -887

A History of Astronomy. A. Pannekoek. Reviewed by Yu. G. Perel' -293
Astronomical Dictionary. Josip Kleczek. Reviewed by Yu. G. Perel' -296
Forty Years of Astronomy in the USSR: 1917-1957. Reviewed by S. A. Kaplan -127
Physical Processes within the Stars. D. A. Frank-Kamenetskii. Reviewed by S. Kaplan -600
Physics and Astronomy of the Moon. Z. Kopal, Editor. Reviewed by A. Markov -888
Stellar Atmospheres. J. L. Greenstein, Editor. Reviewed by É. R. Mustel' -890
Structure and Evolution of the Stars. M. Schwarzschild. Reviewed by S. Kaplan -600

Catalogs
A List of Novae Recommended for the Determination of Coordinates and Proper Motions. N. M. Artyukhina and P. N. Kholopov -878
On the Origin of $\Delta\alpha_\alpha$ Errors. G. P. Pil'nik -100

Celestial Mechanics
An Example of "Exchange" in the Three-Body Problem with a Negative Energy Constant. V. M. Alekseev -858
Distribution of Comets of the Jupiter Group. III. K. A. Shteins -709
New Examples of Capture in the Three-Body Problem. V. M. Alekseev -565
On One Case of Central Motion. N. N. Makeev -718
On Perturbations in the Translational-Rotational Motion of a Satellite and Planet Caused by Their Oblateness. V. T. Kondurar' -405
On the Existence of Resonance Phenomena in the Motion of a Satellite Resulting from its Shape and the Form of its Orbit. V. T. Kondurar' -865
The Additional Acceleration in the Motion of Celestial Bodies. R. A. Saakyan -721
The Region of Convergence of Series Expansions of the Coordinates of Unperturbed Motion. N. B. Elenevskaya -726

Charged Particles, Acceleration and Emission
Nonstationarity of Spectra of Young Sources of Nonthermal Radio Emission. N. S. Kardashev -317
On the Nature of Radio Galaxies. I. S. Shklovskii -465

Clusters, Open
A Comparison of Luminosity Functions of Open Clusters. G. A. Starikova -821
Star Density in the Praesepe Cluster. N. M. Artyukhina -815
Wide Star Pairs in the Vicinity of Four Open Clusters NGC 1513, 1960, 2099, 6705. N. M. Bronnikova -880

Comets
Absolute Magnitudes of 1954-1960 Comets. S. K. Vsekhsvyatskii -849
Distribution of Comets of the Jupiter Group. III. K. A. Shteins -709
Interaction of Solar Corpuscular Streams with Cometary Atmospheres. I. Shock Waves in Comets. L. S. Marochnik -828
On the Nature and Origin of Comets. V. G. Fesenkov -459
On the Plasma Nature of a Comet's Head. L. S. Marochnik -532
Possible Existence of a Ring of Comets and Meteorites Around Jupiter. S. K. Vsekhsvyatskii -226
The Diffusion of Comets. K. A. Shteins and S. Ya. Sture -398
The Structure of Icy Comet Nuclei. B. Yu. Levin -593

Communist Party of the Soviet Union, XXII Congress
The XXII Congress of the Communist Party of the Soviet Union and the Tasks of Soviet Astronomy -1

Computing and Automatic Computers
Computation and Improvement of the Proper Motions of Stars by Means of Electronic Computers. L. Reizin' -436

Conferences and Meetings
Conference on General and Applied Problems of Theoretical Astronomy. E. A. Grebnikov -440
Conference on the Working Group on the Figure, Rotation, and Orbital Motion of the Moon. A. K. Osipov -138
Conference-Seminar of the Working Group on the Kinematics and Dynamics of Stellar Systems. B. I. Fesenko -602
Extragalactic Astronomy and Cosmogony at the 1961 Conferences in California. A Survey of the Outstanding Problems in 1961. B. A. Vorontsov-Vel'yaminov -131
Plenum of the Commission on the History of Astronomy. Yu. G. Perel' -442
Plenum of the Commission on the History of Astronomy. Yu. G. Perel' -735
The Eleventh General Assembly of the International Astronomical Union in Berkeley. P. G. Kulikovskii -298

Cosmic Rays and Interstellar Medium
On the Isotropy of Primary Cosmic Rays. G. G. Getmantsev -477
The Heating of Interstellar Gas by Cosmic Rays. G. G. Getmantsev -670

Cosmic Rays and Radio Galaxies
Nonstationarity of Spectra of Young Sources of Nonthermal Radio Emission. N. S. Kardashev -317

On the Nature of Radio Galaxies. I. S. Shklovskii -465

The Nature of the Emission from the Radio Galaxy Cygnus A. N. S. Kardashev, A. D. Kuz'min, and S. I. Syrovatskii -167

Cosmic Rays as Cause of Nova Outbursts

Cosmic Rays and Some Astrophysical Phenomena. Nikola St. Kalitsin -591

Cosmic Rays, Origin of

A Criticism of Metagalactic Hypotheses for the Origin of Cosmic Rays. V. A. Razin -20

Nonstationarity of Spectra of Young Sources of Nonthermal Radio Emission. N. S. Kardashev -317

Novae as a Possible Source of Cosmic Rays. É. R. Mustel' -145

Cosmogony and Cosmology

An Empirical Relation between the Rotational and Orbital Momenta of the Major Planets. T. A. Goloborod'ko -592

Isotropic Space with Discrete Gravitational-Field Sources. On the Theory of a Nonhomogeneous Isotropic Universe. M. F. Shirokov and I. Z. Fisher -699

On the Relativistic Theory of the Metagalaxy. G. Paal -706

On the Temperature of the Dust Component of the Protoplanetary Cloud. V. S. Safronov -217

The Stability of Filaments of Gas-Dust Nebulae. T. V. Popova -679

Earth, Atmosphere

Determination of the Height of the Homogeneous Atmosphere and the Extra-Atmospheric Velocity of a Meteor. L. A. Katasev -583

Earth, Rotation

A Determination of the Nonuniformity of Astronomical Time by Means of a Molecular Generator. M. D. Sopel'nikov -279

On the Variation of the Earth's Rotation during the IGY and IGC. N. N. Pavlov and G. V. Staritsyn -90

Eclipse, Solar

An Investigation of the Spectrum of the Solar Corona in the Wavelength Region 7800-12,000 A During the Total Solar Eclipse of February 15, 1961. V. G. Kurt -349

Letter to the Editor. V. G. Kurt -886

Observations of the Solar Radio Emission on Meter Wavelengths During the Total Solar Eclipse of February 15, 1961. Yu. I. Alekseev, V. I. Babii, V. V. Vitkevich, M. V. Gorelova, and A. G. Sukhovei -504

The Structure of the Solar Corona on February 15, 1961 from Observations at Dzhankoi. A. T. Nesmyanovich -210

Envelopes, Stellar

Determination of Build-Up of Radiation Intensity Prior to the Emergence of a Shock Wave at the Surface of a Star. I. A. Klimishin -782

On the Theory of Stellar Shock Waves. I. A. Klimishin - 692

Polarization Observations of β Lyrae. N. M. Shakhovskoi -587

Quantitative Interpretation of Emission-Line Profiles in Wolf-Rayet Spectra. S. V. Rublev -686

Spectrophotometry of AG Pegasi. V. P. Arkhipova and O. D. Dokuchaeva -483

Galaxies

Experience in Image Converter Photography of Galaxies in H_α Light on the 2.6 Meter Reflector of the Crimean Astrophysical Observatory. M. M. Butslov, I. M. Kopylov, V. B. Nikonov, A. B. Severnyi, and K. K. Chuvaev -244

On Intergalactic Absorption. I. D. Karachentsev -427

On the Nature of Radio Galaxies. I. S. Shklovskii -465

On the Nature of the Galaxy M 82. B. E. Markaryan -808

The K-Effect in the Galaxy M 31. I. L. Genkin -813

The Stellar Magnitude of the Jet in NGC 4486. V. I. Moroz -121

Galaxy (Milky Way), Rotation, K-Effect

Deformation of the Gas Disk of the Galaxy. T. A. Lozinskaya and N. S. Kardashev -658

The K-Effect and the Spiral Structure of the Galaxy. I. L. Genkin -10

Galaxy (Milky Way), Structure, Spiral Arms

Deformation of the Gas Disk of the Galaxy. T. A. Lozinskaya and N. S. Kardashev -658

On the Structure of the Spiral Arm in Orion. I. I. Pronik -284

The K-Effect and the Spiral Structure of the Galaxy. I. L. Genkin -10

Gas, Degenerate

On the Cause of Nova Outbursts. T. A. Eminadze -431

On the Nonrelativistic Theory of Superdense Stellar Configurations. G. S. Saakyan -788

Gas, Dynamics

Dynamics of Nova Envelopes. V. G. Gorbatskii -154

Interaction of Solar Corpuscular Streams with Cometary Atmospheres. I. Shock Waves in Comets. L. S. Marochnik -828

On the Theory of Stellar Shock Waves. I. A. Klimishin -692
Supernova Outbursts and the Interstellar Medium. I. S. Shklovskii -162
The Problem of the Gravitational Instability of a Compressible Medium. A. G. Pacholczyk -741
The Zemplene Theorem for a Hot Gas in Equilibrium with Radiation. V. S. Imshennik -426

Gegenschein
Absolute Spectrophotometry of the Gegenschein Continuum. L. M. Gindilis -67
The Gegenschein as an Effect Produced by the Scattering of Light from Particles of Interplanetary Dust. L. M. Gindilis -540

Geomagnetic Activity (see Solar-Terrestrial Relationships)

Gravitational Instability
The Problem of the Gravitational Instability of a Compressible Medium. A. G. Pacholczyk -741
The Stability of a Gravitating Cylinder Against Asymmetrical Oscillations in the Presence of a Magnetic Field. M. V. Vyazovskii -580
The Stability of Filaments of Gas-Dust Nebulae. T. V. Popova -679

Gravity and Gravimetry
Some Considerations on the Lunar Gravitational Field. N. P. Grushinskii and M. U. Sagitov -113

Helium, Twilight Airglow
Twilight Enhancement of the Infrared Helium Line 10,830 A. P. V. Shcheglov -118

Hydrodynamics (see also Magnetohydrodynamics)
The Problem of the Gravitational Instability of a Compressible Medium. A. G. Pacholczyk -741
The Stability of Filaments of Gas-Dust Nebulae. T. V. Popova -679

Hydrogen, Ionized, H II Regions
An Identification of Exciting Stars and a Determination of the Parameters of Emission Nebulae from Radio-Astronomical Data. A. D. Kuz'min and R. I. Noskova -186
Experience in Image Converter Photography of Galaxies in H_α Light on the 2.6 Meter Reflector of the Crimean Astrophysical Observatory. M. M. Butslov, I. M. Kopylov, V. B. Nikonov, A. B. Severnyi, and K. K. Chuvaev -244
Hydrogen Distribution in Some Planetary Nebulae. É. V. Turchaninova -674
Observations of the Source Sagittarius A on 1500 Mc. Ch'in Jung-hao -124
Polarization Observations of β Lyrae. N. M. Shakhovskoi -587
Radiative Thermal Conductivity of a Fully Ionized Plasma. T. D. Kuznetsova and D. A. Frank-Kamenetskii -191
The L_α-Radiation Field in Planetary Nebulae. T. F. Pleshkova -182
The Probability of Hydrogen Ionization by Electron Impact. É. V. Kononovich -811
The Radio Emission Spectrum of Cassiopeia A at Frequencies below 30 Mc. S. Ya. Braude, A. V. Men', I. N. Zhuk, and K. A. Babenkov -122

Hydrogen, Neutral, H I Regions
Deformation of the Gas Disk of the Galaxy. T. A. Lozinskaya and N. S. Kardashev -658
Hydrogen Distribution in Some Planetary Nebulae. É. V. Turchaninova -674
Neutral Hydrogen in the T-Association Tau T2. G. B. Sholomitskii -595
The K-Effect and the Spiral Structure of the Galaxy. I. L. Genkin -10
The L_α-Radiation Field in Planetary Nebulae. T. F. Pleshkova -182
Type II Supernova Ejecta and H_α-Emission Stars. R. E. Gershberg -802

Hydrogen, Planetary Nebulae
Hydrogen Distribution in Some Planetary Nebulae. É. V. Turchaninova -674
The L_α-Radiation Field in Planetary Nebulae. T. F. Pleshkova -182

Hydrogen, Spectral Lines
Hydrogen Lines in the Spectra of Prominences. V. V. Sobolev -497
Letter to the Editor. R. E. Gershberg -126
On Gordon and Pichakhchi's Paper, "Emission by Hydrogen Atoms Excited by Synchrotron Radiation from Relativistic Electrons." V. V. Ivanov -597
On the Nature of the Galaxy M 82. B. E. Markaryan -808
Spectrophotometry of AG Pegasi. V. P. Arkhipova and O. D. Dokuchaeva -483
The Emission Star HD 51585. V. P. Arkhipov -286

IGC and IGY
On the Variation of the Earth's Rotation during the IGY and IGC. N. N. Pavlov and G. V. Staritsyn -90

Infrared, Observations in
Experimental Television Photographs of the Moon in the Spectral Region λλ 0.8-2.3 μ. N. F. Kuprevich -883
Twilight Enhancement of the Infrared Helium Line 10,830 A. P. V. Shcheglov -118

Instruments and Accessories
A Low Power High Voltage Converter for Photoelectric Instruments. B. P. Potapov -289

A New Mirror-Lens Objective. T. S. Belorossova, N. V. Merman, and M. A. Sosnina -260
An Investigation of the Spectrum of the Solar Corona in the Wavelength Region 7800-12,000 A During the Total Solar Eclipse of February 15, 1961. V. G. Kurt -349
A Photoelectric Attachment to a Printing Chronograph. B. A. Kamochkin and S. S. Tovchigrechko -291
A Secondary Energy Standard for the Spectral Region λλ 2450-26,000 A. G. F. Sitnik -558
Automatic Performance of Astrometric Measurements of Lunar Plates with a Photoelectric Device. N. F. Bystrov -109
Contact Photography of Faint Emission Objects. I. V. Volkov, V. F. Esipov, and P. V. Shcheglov -253
Experience in Image Converter Photography of Galaxies in H_α Light on the 2.6 Meter Reflector of the Crimean Astrophysical Observarory. M. M. Butslov, I. M. Kopylov, V. B. Nikonov, A. B. Severnyi, and K. K. Chuvaev -244
Improved Device for Suppressing "Spurious Pulses" of Transit Contact Micrometer. S. S. Tovchigrechko -433
Investigation of Instrumental Errors of a Photographic Zenith Tube. V. A. Naumov -264
Letter to the Editor. V. G. Kurt -886
Temperature Effects on Determination of the Angular Value of a Micrometer Screw Turn in the Ocular Micrometer of the ZT-180 Zenith Telescope, Using the Method of Wide Scale Pairs. A. A. Gurshtein -272

Interplanetary Medium
Absolute Spectrophotometry of the Gegenschein Continuum. L. M. Gindilis -67
The Gegenschein as an Effect Produced by the Scattering of Light from Particles of Interplanetary Dust. L. M. Gindilis -540

Interstellar and Intergalactic Medium
A Criticism of Metagalactic Hypotheses for the Origin of Cosmic Rays. V. A. Razin -20
Deformation of the Gas Disk of the Galaxy. T. A. Lozinskaya and N. S. Kardashev -658
Interstellar Absorption Near the Supernova of 1572. É. S. Brodskaya and N. B. Grigor'eva -586
On the Isotropy of Primary Cosmic Rays. G. G. Getmantsev -477
On the Nature of Radio Galaxies. I. S. Shklovskii -465
On the Structure of the Spiral Arm in Orion. I. I. Pronik -284
Polarization of 21-cm Radiation of the Crab Nebula. V. A. Udal'tsov -665
Supernova Outbursts and the Interstellar Medium. I. S. Shklovskii -162
The Heating of Interstellar Gas by Cosmic Rays. G. G. Getmantsev -670
The Radio Emission Spectrum of Cassiopeia A at Frequencies below 30 Mc. S. Ya. Braude, A. V. Men', I. N. Zhuk, and K. A. Babenkov -122

K-Effect
Deformation of the Gas Disk of the Galaxy. T. A. Lozinskaya and N. S. Kardashev -658
The K-Effect and the Spiral Structure of the Galaxy. I. L. Genkin -10
The K-Effect in the Galaxy M 31. I. L. Genkin -813

Latitude and Longitude
On the Origin of $\Delta\alpha_\alpha$ Errors. G. P. Pil'nik -100

Letters to the Editor
Eclipsing Binaries and the Dispersion of the Velocity of Light in a Vacuum. V. A. Bunin -598
Letter to the Editor. R. E. Gershberg -126
Letter to the Editor. V. G. Kurt -886
On Gordon and Pichakhchi's Paper, "Emission by Hydrogen Atoms Excited by Synchrotron Radiation from Relativistic Electrons." V. V. Ivanov -597

Luminosity Function
A Comparison of Luminosity Functions of Open Clusters. G. A. Starikova -821

Magnetohydrodynamics
Magnetohydrodynamic Instability of Solar Corpuscular Streams. V. P. Dokuchaev -784
The Instability of a Plasma Layer with a Neutral-Point Magnetic Field. A. B. Severnyi -770
The Problem of the Gravitational Instability of a Compressible Medium. A. G. Pacholczyk -741
The Stability of a Gravitating Cylinder Against Asymmetrical Oscillations in the Presence of a Magnetic Field. M. V. Vyazovskii -580
The Stability of Plasma in a Nonuniform Magnetic Field and the Mechanism of Solar Flares. S. I. Syrovatskii -768

Meteoric Material
Possible Existence of a Ring of Comets and Meteorites Around Jupiter. S. K. Vsekhsvyatskii -226
The Structure of Icy Comet Nuclei. B. Yu. Levin -593

Meteors and Meteorites
Determination of the Height of the Homogeneous Atmosphere and the Extra-Atmospheric Velocity of a Meteor. L. A. Katasev -583

Moon, Astrometry
An Unsolved Astrometrical Problem. A. A. Yakovkin -573

Automatic Performance of Astrometric Measurements of Lunar Plates with a Photoelectric Device. N. F. Bystrov -109
Determination of the Position of the Moon's Center of Mass from Photographic Observations. N. F. Bystrov -412

Moon, Gravitational Field
Some Considerations on the Lunar Gravitational Field. N. P. Grushinskii and M. U. Sagitov -113

Moon, Infrared Observations
Experimental Television Photographs of the Moon in the Spectral Region λλ 0.8-2.3 μ. N. F. Kuprevich -883

Moon, Motion
The Additional Acceleration in the Motion of Celestial Bodies. R. A. Saakyan -721

Moon, Properties of Surface
Lunar Thermal Radio Emission in the Centimeter Band and Some Characteristics of the Surface Layer. A. E. Salomonovich -55
Measurement of the Polarization of Lunar Radio Emission on a Wavelength of 3.2 cm. N. S. Soboleva -873
Nature and Physical State of the Surface Layer of the Moon. V. S. Troitskii -51
Radio-Brightness Distribution on the Lunar Disk at 0.8 cm. A. E. Salomonovich and B. Ya. Losovskii -833
The Emissivity of the Moon at Centimeter Wavelengths. V. D. Krotikov and V. S. Troitskii -845
The Microstructure of the Lunar Surface. N. P. Barabashov and V. I. Garazha -237
Visual Colorimetry of the Lunar Surface. V. V. Sharonov -62

Nebulae, Dark
Methods of Investigation of Thin, Dark Nebulae by Means of Star Counts. T. A. Uranova -376
On the Structure of the Spiral Arm in Orion. I. I. Pronik -284
The Proper Motion of the Star BD+40° 4124 Associated with Nebula S 213. N. M. Artyukhina -429

Nebula, Extragalactic (see Galaxies)

Nebulae, Gaseous
An Identification of Exciting Stars and a Determination of the Parameters of Emission Nebulae from Radio-Astronomical Data. A. D. Kuz'min and R. I. Noskova -186
Letter to the Editor. R. E. Gershberg -126
The Proper Motion of the Star BD+40° 4124 Associated with Nebula S 213. N. M. Artyukhina -429
The Stability of Filaments of Gas-Dust Nebulae. T. V. Popova -679
Wavelengths of Forbidden Lines of Sulfur in Nebulae. V. F. Esipov -287

Nebulae, Planetary
Determination of the Coordinates of Planetary Nebulae from Photographs taken with an Objective Prism. Yu. L. Frantsman -198
Hydrogen Distribution in Some Planetary Nebulae. É. V. Turchaninova -674
Masses and Forms of Planetary Nebulae. G. S. Khromov -370
The L_α-Radiation Field in Planetary Nebulae. T. F. Pleshkova -182

Nebulae, Supernova Remnants
Polarization of 21-cm Radiation of the Crab Nebula. V. A. Udal'tsov -665
The Luminosity Effect of Radio Galaxies. Yu. P. Pskovskii -172
The Spectra of the Discrete Radio Sources Observed with the 22-m Radio Telescope. A. D. Kuz'min -15
Type II Supernova Ejecta and H_α-Emission Stars. R. E. Gershberg -802

Novae, Catalogs
A List of Novae Recommended for the Determination of Coordinates and Proper Motions. N. M. Artyukhina and P. N. Kholopov -

Novae, Dynamics of Envelopes
Dynamics of Nova Envelopes. V. G. Gorbatskii -154
Novae as a Possible Source of Cosmic Rays. É. R. Mustel' -145
Spherically Symmetrical Models of Nova Outbursts. D. K. Nadezhin and D. A. Frank-Kamenetskii -779

Novae, Outbursts
Cosmic Rays and Some Astrophysical Phenomena. Nikola St. Kalitsin -591
On the Cause of Nova Outbursts. T. A. Eminadze -431
Spherically Symmetrical Models of Nova Outbursts. D. K. Nadezhin and D. A. Frank-Kamenetskii -779

Novae, Remnants
The Spectra of the Discrete Radio Sources Observed with the 22-m Radio Telescope. A. D. Kuz'min -15

Nuclear Reactions
On the Cause of Nova Outbursts. T. A. Eminadze -431

Orbits, Theory and Computation
An Example of "Exchange" in the Three-Body Problem with a Negative Energy Constant. V. M. Alekseev -858
New Determinations of Elements of Visual-Binary Orbits. A. V. Bespalov -882
New Examples of Capture in the Three-Body Problem. V. M. Alekseev -565
On One Case of Central Motion. N. N. Makeev -718
On Peturbations in the Translational-Rotational Motion of a Satellite and Planet Caused by Their Oblateness. V. T. Kondurar' -405
On the Existence of Resonance Phenomena in the Motion of a Satellite Resulting from its Shape and the Form of its Orbit. V. T. Kondurar' -865
The Additional Acceleration in the Motion of Celestial Bodies. R. A. Saakyan -721
The Region of Convergence of Series Expansions of the Coordinates of Unperturbed Motion. N. B. Elenevskaya -726

Photographic Observations
Automatic Performance of Astrometric Measurements of Lunar Plates with a Photoelectric Device. N. F. Bystrov -109
Contact Photography of Faint Emission Objects. I. V. Volkov, V. F. Esipov, and P. V. Shcheglov -253
Determination of the Coordinates of Planetary Nebulae from Photographs Taken with an Objective Prism. Yu. L. Frantsman -198
Determination of the Height of the Homogeneous Atmosphere and the Extra-Atmospheric Velocity of a Meteor. L. A. Katasev -583
Determination of the Position of the Moon's Center of Mass from Photographic Observations. N. F. Bystrov -412
Experience in Image Converter Photography of Galaxies in H_α Light on the 2.6 Meter Reflector of the Crimean Astrophysical Observatory. M. M. Butslov, I. M. Kopylov, V. B. Nikonov, A. B. Severnyi, and K. K. Chuvaev -244
Experimental Television Photographs of the Moon in the Spectral Region $\lambda\lambda$ 0.8-2.3 μ. N. F. Kuprevich -883
Hydrogen Distribution in Some Planetary Nebulae. É. V. Turchaninova -674
Increasing the Sensitivity of Astronomical Photographic Plates. O. D. Dokuchaeva and L. Ya. Kraush -855
Interstellar Absorption Near the Supernova of 1572. É. S. Brodskaya and N. B. Grigor'eva -586
On the Nature of the Galaxy M 82. B. E. Markaryan -808
Some Peculiarities of the Magnetic Field in the Solar Corona. A. T. Nesmyanovich -774
Star Density in the Praesepe Cluster. N. M. Artyukhina -815
The Magnitude Equation Due to Coma of an Astrograph Objective. L. A. Golovina -416
The Proper Motion of the Star BD+40° 4124 Associated with Nebula S 213. N. M. Artyukhina -429
The Stellar Magnitude of the Jet in NGC 4486. V. I. Moroz -121

Photometry
Absolute Magnitudes of 1954-1960 Comets. S. K. Vsekhsvyatskii -849
A Study of the Contrast Between Faculae and the Photosphere in the Region $\lambda\lambda$ 3755-6800 A. V. D. Kuz'minykh -751
Interstellar Absorption Near the Supernova of 1572. É. S. Brodskaya and N. B. Grigor'eva -586
On Intergalactic Absorption. I. D. Karachentsev -427
On the Observations of the Occulation of Stars by Saturn's Rings. M. S. Bobrov -525
The Microstructure of the Lunar Surface. N. P. Barabashov and V. I. Garazha -237
The Stellar Magnitude of the Jet in NGC 4486. V. I. Moroz -121
The Visibility of Sunspots on the Solar Disc and the East-West Asymmetry of Solar Activity. II. P. R. Romanchuk -354

Planets and Satellites, Atmospheres
On the Amount of Water Available in a Free State on Mars. A. I. Lebedinskii and G. I. Salova -390
On the Radius of Venus. II. D. Ya. Martynov -511
Several Properties of the Yellow Haze Observed on Mars during 1956. I. K. Koval' and A. V. Morozhenko -45

Planets and Satellites, Formation
An Empirical Relation between the Rotational and Orbital Momenta of the Major Planets. T. A. Goloborod'ko -592
On the Temperature of the Dust Component of the Protoplanetary Cloud. V. S. Safronov -217

Planets and Satellites, Influence on Comets and Meteoric Matter
Distribution of Comets of the Jupiter Group. III. K. A. Shteins -709
On the Nature and Origin of Comets. V. G. Fesenkov -459
On the Ring Encircling Jupiter. I. T. Zotkin -236
Possible Existence of a Ring of Comets and Meteorites around Jupiter. S. K. Vsekhsvyatskii -226

Planets and Satellites, Observations
4-mm Radio Emission from Venus. A. G. Kislyakov, A. D. Kuz'min, and A. E. Salomonovich -328

Observations of Radio Emission from Venus and Jupiter at 8 mm Wavelength. A. D. Kuz'min and A. E. Salomonovich -518
Observations of the Radio Emission from Venus and Jupiter on a Wavelength of 3.3 cm. V. P. Bibinova, A. D. Kuz'min, A. E. Salomonovich, and I. V. Shavlovskii -840
On the Radius of Venus. II. D. Ya. Martynov -511

Planets and Satellites, Occulations of Stars by
On the Observation of the Occulation of Stars by Saturn's Rings. M. S. Bobrov -525
On the Radius of Venus. II. D. Ya. Martynov -511

Planets and Satellites, Motion
An Empirical Relation between the Rotational and Orbital Momenta of the Major Planets. T. A. Goloborod'ko -592
On Perturbations in the Translational-Rotational Motion of a Satellite and Planet Caused by Their Oblateness. V. T. Kondurar' -405
On the Existence of Resonance Phenomena in the Motion of a Satellite Resulting from its Shape and the Form of its Orbit. V. T. Kondurar' -865
The Additional Acceleration in the Motion of Celestial Bodies. R. A. Saakyan -721

Plasma
On the Plasma Nature of a Comet's Head. L. S. Marochnik -532
Radiative Thermal Conductivity of a Fully Ionized Plasma. T. D. Kuznetsova and D. A. Frank-Kamenetskii -191
Supernova Outbursts and the Interstellar Medium. I. S. Shklovskii -162
The Instability of a Plasma Layer with a Neutral-Point Magnetic Field. A. B. Severnyi -770
The Stability of Plasma in a Nonuniform Magnetic Field and the Mechanism of Solar Flares. S. I. Syrovatskii -768

Polarization and Polarimetry
Measurement of the Polarization of Lunar Radio Emission on a Wavelength of 3.2 cm. N. S. Soboleva -873
Polarization Observations of β Lyrae. N. M. Shakhovskoi -587
Polarization of 21-cm Radiation of the Crab Nebula. V. A. Udal'tsov -665

Practical Astronomy
Absolute Spectrophotometry of the Gegenschein Continuum. L. M. Gindilis -67
A Diurnal Term in Time-Service Observations. N. S. Kalikhevich -275
A Low Power High Voltage Converter for Photoelectric Instruments. B. P. Potapov -289
An Empirical Relation between the Rotational and Orbital Momenta of the Major Planets. T. A. Goloborod'ko -592
An Unsolved Astrometrical Problem. A. A. Yakovkin -573
A Photoelectric Attachment to a Printing Chronograph. B. A. Komachkin and S. S. Tovchigrechko -291
A Secondary Energy Standard for the Spectral Region λλ 2450-26,000 A. G. F. Sitnik -558
Computation and Improvement of the Proper Motions of Stars by Means of Electronic Computers. L. Reizin' -436
Determination of the Position of the Moon's Center of Mass from Photographic Observations. N. F. Bystrov -412
Increasing the Sensitivity of Astronomical Photographic Plates. O. D. Dokuchaeva and L. Ya. Kraush -855
Investigation of Instrumental Errors of a Photographic Zenith Tube. V. A. Naumov -264
Methods of Investigation of Thin, Dark Nebulae by Means of Star Counts. T. A. Uranova -376
On the Observation of the Occulation of Stars by Saturn's Rings. M. S. Bobrov -525
On the Observed Depths of Sunspots. V. F. Chistyakov -363
On the Origin of $\Delta\alpha_\alpha$ Errors. G. P. Pil'nik -100
On the Radius of Venus. II. D. Ya. Martynov -511
Realization of a Black Body Model at Various Temperatures. G. F. Sitnik -84
Temperature Effects on Determination of the Angular Value of a Micrometer Screw Turn in the Ocular Micrometer of the ZT-180 Zenith Telescope, Using the Method of Wide Scale Pairs. A. A. Gurshtein -272
The Astronomical Unit of Length. A. A. Mikhailov -449
The Magnitude Equation Due to Coma of an Astrograph Objective. L. A. Golovina -416
The Visibility of Sunspots on the Solar Disk and East-West Asymmetry of Solar Activity. II. P. R. Romanchuk -354
Visibility of Spots on the Solar Disk and East-West Asymmetry of Solar Activity. I. P. R. Romanchuk -33

Radiation, and Gas Dynamics
On the Theory of Stellar Shock Waves. I. A. Klimishin -692
The Zemplene Theorem for a Hot Gas in Equilibrium with Radiation. V. S. Imshennik -426

Radiation, Photoionization
Extreme Ultraviolet Solar Radiation and the Structure of the Solar Atmosphere in Active and Undis-

turbed Regions. G. S. Ivanov-Kholodnyi and G. M. Nikol'skii -609
The Photoionization of Excited Complex Atoms and Ions. L. M. Biberman, G. É. Norman, and K. N. Ul'yanov -77

Radiation, Scattering
Diffusion of Resonance Radiation in Stellar Atmospheres and Nebulae. I. Semiinfinite Medium. V. V. Ivanov -793
On the Nature and Origin of Comets. V. G. Fesenkov -459
On the Stability of Stellar Rotation. V. V. Porfir'ev -555
Polarization Observations of β Lyrae. N. M. Shakhovskoi -587
Some Relations in the Theory of Radiation Scattering. V. V. Sobolev -178
The Formation of K_3 and H_3 Absorption Components on the Emission Lines in the Solar Spectrum. V. L. Khokhlova -757
The Gegenschein as an Effect Produced by the Scattering of Light from Particles of Interplanetary Dust. L. M. Gindilis -540
The Scattering of Light in a Nonsteady-State Medium. S. A. Kaplan -549

Radiation, Transport
Continuous Spectra of Hot Stars. A. K. Kolesov -24
Determination of Build-Up of Radiation Intensity Prior to the Emergence of a Shock Wave at the Surface of a Star. I. A. Klimishin -782
Diffusion of Resonance Radiation in Stellar Atmospheres and Nebulae. I. Semiinfinite Medium. V. V. Ivanov -793
Hydrogen Distribution in Some Planetary Nebulae. É. V. Turchaninova -674
Hydrogen Lines in the Spectra of Prominences. V. V. Sobolev -497
On the Temperature of the Dust Component of the Protoplanetary Cloud. V. S. Safronov -217
The L_α-Radiation Field in Planetary Nebulae. T. F. Pleshkova -182
The Scattering of Light in a Nonsteady-State Medium. S. A. Kaplan -549

Radio Astronomy, Discrete Sources
An Identification of Exciting Stars and a Determination of the Parameters of Emission Nebulae from Radio-Astronomical Data. A. D. Kuz'min and R. I. Noskova -186
Interstellar Absorption Near the Supernova of 1572. É. S. Brodskaya and N. B. Grigor'eva -586
Magnetohydrodynamic Instability of Solar Corpuscular Streams. V. P. Dokuchaev -784
Nonstationarity of Spectra of Young Sources of Nonthermal Radio Emission. N. S. Kardashev -317
On the Nature of Radio Galaxies. I. S. Shklovskii -465
On the Nature of the Galaxy M 82. B. E. Markaryan -808
Polarization of 21-cm Radiation of the Crab Nebula. V. A. Udal'tsov -665
Precision Measurements of the Spectrum of the Discrete Source Cassiopeia-A in the Centimeter Region. K. S. Stankevich -480
The Luminosity Effect of Radio Galaxies. Yu. P. Pskovskii -172
The Nature of the Emission from the Radio Galaxy Cygnus A. N. S. Kardashev, A. D. Kuz'min, and S. I. Syrovatskii -167
The Radio Emission Spectrum of Cassiopeia A at Frequencies below 30 Mc. S. Ya Braude, A. V. Men', I. N. Zhuk, and K. A. Babenkov -122
The Spectra of the Discrete Radio Sources Observed with the 22-m Radio Telescope. A. D. Kuz'min -15

Radio Astronomy, Emission Mechanisms
A Criticism of Metagalactic Hypotheses for the Origin of Cosmic Rays. V. A. Razin -20
Nonstationarity of Spectra of Young Sources of Nonthermal Radio Emission. N. S. Kardashev -317
The Origin of the Slowly Varying Component of Solar Radio Emission. V. V. Zheleznyakov -3

Radio Astronomy, Galaxy
Deformation of the Gas Disk of the Galaxy. T. A. Lozinskaya and N. S. Kardashev -658
Observations of the Source Sagittarius A on 1500 Mc. Ch'in Jung-hao -124
Supernova Outbursts and the Interstellar Medium. I. S. Shklovskii -162
The Radio Spectrum of the Galactic Nucleus. V. G. Malumyan -585

Radio Astronomy, Moon and Planets
4-mm Radio Emission from Venus. A. G. Kislyakov, A. D. Kuz'min, and A. E. Salomonovich -328
Lunar Thermal Radio Emission in the Centimeter Band and Some Characteristics of the Surface Layer. A. E. Salomonovich -55
Measurement of the Polarization of Lunar Radio Emission on a Wavelength of 3.2 cm. N. S. Soboleva -873
Nature and Physical State of the Surface Layer of the Moon. V. S. Troitskii -51
Observations of the Radio Emission from Venus and Jupiter on a Wavelength of 3.3 cm. V. P. Bibinova, A. D. Kuz'min, A. E. Salomonovich, and I. V. Shavlovskii -833
Radio-Brightness Distribution on the Lunar Disk at 0.8 cm. A. E. Salomonovich and B. Ya. Losovskii -840

The Emissivity of the Moon at Centimeter Wavelengths. V. D. Krotikov and V. S. Troitskii -845

Radio Astronomy, Spectra of Sources

Nonstationarity of Spectra of Young Sources of Nonthermal Radio Emission. N. S. Kardashev -317

Precision Measurements of the Spectrum of the Discrete Source Cassiopeia-A in the Centimeter Region. K. S. Stankevich -480

Solar Radio Emission on a Wavelength of 8 mm. A. E. Salomonovich -202

The Luminosity Effect of Radio Galaxies. Yu. P. Pskovskii -172

The Nature of the Emission from the Radio Galaxy Cygnus A. N. S. Kardashev, A. D. Kuz'min, and S. I. Syrovatskii -167

The Radio Emission Spectrum of Cassiopeia A at Frequencies below 30 Mc. S. Ya. Braude, A. V. Men', I. N. Zhuk, and K. A. Babenkov -122

The Radio Spectrum of the Galactic Nucleus. V. G. Malumyan -585

The Spectra of the Discrete Radio Sources Observed with the 22-m Radio Telescope. A. D. Kuz'min -15

The Stellar Magnitude of the Jet in NGC 4486. V. I. Moroz -121

Radio Astronomy, Sun

Extreme Ultraviolet Solar Radiation and the Structure of the Solar Atmosphere in Active and Undisturbed Regions. G. S. Ivanov-Kholodnyi and G. M. Nikol'skii -609

Observations of Radio Emission from Venus and Jupiter at 8 mm Wavelength. A. D. Kuz'min and A. E. Salomonovich -518

Observations of the Solar Radio Emission on Meter Wavelengths During the Total Solar Eclipse of February 15, 1961. Yu. I. Alekseev, V. I. Babii, V. V. Vitkevich, M. V. Gorelova, and A. G. Sukhovei -504

Observations of the Spectra of Solar Radio Outbursts in the 10-25 Mc Region on July 14 and 18, 1961. L. G. Sodin, S. Ya. Braude, and A. V. Men' -423

Solar Radio Emission on a Wavelength of 8 mm. A. E. Salomonovich -202

The Origin of the Slowly Varying Component of Solar Radio Emission. V. V. Zheleznyakov -3

X-Ray Emission from Flares. A. S. Dvoryashin, L. S. Levitskii, and A. K. Pankratov -340

Radio Astronomy, 21-cm Radiation

Deformation of the Gas Disk of the Galaxy. T. A. Lozinskaya and N. S. Kardashev -658

Neutral Hydrogen in the T-Association Tau T2. G. B. Sholomitskii -595

Observations of the Source Sagittarius A on 1500 Mc. Ch'in Jung-hao -124

Polarization of 21-cm Radiation of the Crab Nebula. V. A. Udal'tsov -665

The K-Effect and the Spiral Structure of the Galaxy. I. L. Genkin -10

Refraction, Atmospheric

On the Origin of $\Delta\alpha_\alpha$ Errors. G. P. Pil'nik -100

Relativity and Gravitation

Isotropic Space with Discrete Gravitational-Field Sources. On the Theory of a Nonhomogeneous Isotropic Universe. M. F. Shirokov and I. Z. Fisher -699

On the Relativistic Theory of the Metagalaxy. G. Paal -706

Shock Waves

Determination of Build-Up of Radiation Intensity Prior to the Emergence of a Shock Wave at the Surface of a Star. I. A. Klimishin -782

Interaction of Solar Corpuscular Streams with Cometary Atmospheres. I. Shock Waves in Comets. L. S. Marochnik -828

Novae as a Possible Source of Cosmic Rays. É. R. Mustel' -145

On the Isotropy of Primary Cosmic Rays. G. G. Getmantsev -477

On the Plasma Nature of a Comet's Head. L. S. Marochnik -532

On the Theory of Stellar Shock Waves. I. A. Klimishin -692

Spherically Symmetrical Models of Nova Outbursts. D. K. Nadezhin and D. A. Frank-Kamenetskii -779

Supernova Outbursts and the Interstellar Medium. I. S. Shklovskii -162

The Zemplene Theorem for a Hot Gas in Equilibrium with Radiation. V. S. Imshennik -426

Type II Supernova Ejecta and H_α-Emission Stars. R. E. Gershberg -802

Solar-Terrestrial Relationships

Magnetohydrodynamic Instability of Solar Corpuscular Streams. V. P. Dokuchaev -784

Observations of the Spectra of Solar Radio Outbursts in the 10-25 Mc Region on July 14 and 18, 1961. L. G. Sodin, S. Ya. Braude, and A. V. Men' -423

On the Spatial Structure of the Solar Corona. II. É. R. Mustel' -488

Properties of M-Type Corpuscular Streams, Found from Analysis of Their Effect on the Troposphere. B. D. Fomenko -653

The Hypothesis Concerning the Cone of Avoidance in the Problem of the Origin of Corpuscular Streams. É. R. Mustel' -28

The Longitude Distribution of Active Regions on the Sun and the Problem of Geomagnetic Disturbances. É. R. Mustel' -638

The Spatial Structure of the Solar Corona. I. É. R. Mustel' -333
X-Ray Emission from Flares. A. S. Dvoryashin, L. S. Levitskii, and A. K. Pankratov -340

Spectra, Atomic and Molecular
Extreme Ultraviolet Solar Radiation and the Structure of the Solar Atmosphere in Active and Undisturbed Regions. G. S. Ivanov-Kholodnyi and G. M. Nikol'skii -609
On Gordon and Pichakhchi's Paper, "Emission by Hydrogen Atoms Excited by Synchrotron Radiation from Relativistic Electrons." V. V. Ivanov -597
On the Plasma Nature of a Comet's Head. L. S. Marochnik -532
On the Relative Intensities of the Coronal Lines Fe XIII λ 10,747 and λ 10,798. V. G. Kurt -620
Sensitive Bi I lines in the Solar Spectrum. V. P. Kachalov -760
The Photoionization of Excited Complex Atoms and Ions. L. M. Biberman, G. É. Norman, and K. N. Ul'yanov -77
The Probability of Hydrogen Ionization by Electron Impact. É. V. Kononovich - 811
Vibrational Transition Probabilities for Band Systems of Some Diatomic Oxides. F. A. Ortenberg and V. B. Glasko -714
Wavelengths of Forbidden Lines of Sulfur in Nebulae. V. F. Esipov -287

Spectra, Line Profiles
An Investigation of the Spectrum of the Solar Corona in the Wavelength Region 7800-12,000 A During the Total Solar Eclipse of February 15, 1961. V. G. Kurt -349
Diffusion of Resonance Radiation in Stellar Atmospheres and Nebulae. I. Semiinfinite Medium. V. V. Ivanov -793
Hydrogen Lines in the Spectra of Prominences. V. V. Sobolev - 497
Letter to the Editor. V. G. Kurt -886
Quantitative Interpretation of Emission-Line Profiles in Wolf-Rayet Spectra. S. V. Rublev -686
The Formation of K_3 and H_3 Absorption Components on the Emission Lines in the Solar Spectrum. V. L. Khokhlova -875

Spectra, of Nebulae
Determination of the Coordinates of Planetary Nebulae from Photographs taken with an Objective Prism. Yu. L. Frantsman -198
On the Nature of the Galaxy M 82. B. E. Markaryan -808
Wavelengths of Forbidden Lines of Sulfur in Nebulae. V. F. Esipov -287

Spectra, Solar
An Investigation of the Spectrum of the Solar Corona in the Wavelength Region 7800-12,000 A During the Total Solar Eclipse of February 15, 1961. V. G. Kurt -349
Letter to the Editor. V. G. Kurt -886
Sensitive Bi I Lines in the Solar Spectrum. V. P. Kachalov -760
The Formation of K_3 and H_3 Absorption Components on the Emission Lines in the Solar Spectrum. V. L. Khokhlova -875

Spectra, Stellar
Continuous Spectra of Hot Stars. A. K. Kolesov -24
Excess Ultraviolet Radiation in the Spectrum of FU Orionis. R. A. Bartaya -119
Quantitative Interpretation of Emission-Line Profiles in Wolf-Rayet Spectra. S. V. Rublev -686
The Emission Star HD 51585. V. P. Arkhipov -286

Spectrophotometry
Absolute Spectrophotometry of the Gegenschein Continuum. L. M. Gindilis -67
A Secondary Energy Standard for the Spectral Region λλ 2450-26,000 A. G. F. Sitnik -558
Realization of a Black Body Model at Various Temperatures. G. F. Sitnik -84
Spectrophotometry of AG Pegasi. V. P. Arkhipova and O. D. Dokuchaeva -483
The Emission Star HD 51585. V. P. Arkhipov -286

Star Counts
Methods of Investigation of Thin, Dark Nebulae by Means of Star Counts. T. A. Uranova -376
Star Density in the Praesepe Cluster. N. M. Artyukhina -815

Stars, and Emission Nebulae
An Identification of Exciting Stars and a Determination of the Parameters of Emission Nebulae from Radio-Astronomical Data. A. D. Kuz'min and R. L. Noskova -186
Experience in Image Converter Photography of Galaxies in H_α Light on the 2.6 Meter Reflector of the Crimean Astrophysical Observatory. M. M. Butslov, I. M. Kopylov, V. B. Nikonov, A. B. Severnyi, and K. K. Chuvaev -244
Observations of the Source Sagittarius A on 1500 Mc. Ch'in Jung-hao -124

Stars, Atmospheres
Continuous Spectra of Hot Stars. A. K. Kolesov -24

Stars, Emission-line
Quantitative Interpretation of Emission-Line Profiles in Wolf-Rayet Spectra. S. V. Rublev -686
Spectrophotometry of AG Pegasi. V. P. Arkhipova and O. D. Dokuchaeva -483
The Emission Star HD 51585. V. P. Arkhipov -286
Type II Supernova Ejecta and H_α-Emission Stars. R. E. Gershberg -802

Stars, Formation
The Stability of Filaments of Gas-Dust Nebulae. T. V. Popova -679

Stars, Multiple
Eclipsing Binaries and the Dispersion of the Velocity of Light in a Vacuum. V. A. Bunin -598
New Determinations of Elements of Visual-Binary Orbits. A. V. Bespalov -882
The Region of Convergence of Series Expansions of the Coordinates of Unperturbed Motion. N. B. Elenevskaya -726
Wide Star Pairs in the Vicinity of Four Open Clusters NGC 1513, 1960,2099, 6705. N. M. Bronnikova -880

Stars, Positions
A List of Novae Recommended for the Determination of Coordinates and Proper Motions. N. M. Artyukhina and P. N. Kholopov - 878

Stars, Proper Motions
A List of Novae Recommended for the Determination of Coordinates and Proper Motions. N. M. Artyukhina and P. N. Kholopov -878
Computation and Improvement of the Proper Motions of Stars by Means of Electronic Computers. L. Reizin' -436
The Proper Motion of the Star BD+40° 4124 Associated with Nebula S 213. N. M. Artyukhina -429

Stars, Rotation
On the Stability of Stellar Rotation. V. V. Porfir'ev -555
Retardation of Stellar Rotation. V. F. Belevich -696
The Stability of Stellar Rotation. I. V. V. Porfir'ev - 806

Stars, Spectra
Continuous Spectra of Hot Stars. A. K. Kolesov -24
Excess Ultraviolet Radiation in the Spectrum of FU Orionis. R. A. Bartaya -119
Quantitative Interpretation of Emission-Line Profiles in Wolf-Rayet Spectra. S. V. Rublev -686
